To Whom it May Concern:

July 10, 2025

This correspondence is to serve as a Letter of Recommendation for Vidhi Arun Sharma, who is an applicant for employment with your firm. Vidhi was a student in my AD 605 Operations Management Business Process Fundamentals course in the Boston University Metropolitan College Master's Degree Program. She received her MS in Applied Business Analytics in 2025 from Boston University Metropolitan College. Her undergraduate degree in Computer Science was completed in 2022 from MIT.

Vidhi's work experience is significant. She performed business analytics working as a Business Analyst for Maharag Multi-Systems, where she improved workflow efficiency, data analysis accuracy, data inquiry resolution, while enhancing corporate decision making and client retention.

I can confirm that Vidhi received the highest grade in the class. Her quantitative knowledge base is outstanding. Her written and oral skills are exceptional. She was perceived as a leader by her classmates. Please note that I have been a Department Chair and a Commonwealth of Massachusetts Department of Education-appointed Dean. It is my opinion that Vidhi is the caliber of individual that should be recruited by your corporation, not just hired. In the future, she will bring only pride to your company. Feel free to call me with any questions.
